17th June 2019

PSHE topic Health and Wellbeing

Dear Parents

We know that promoting the health and wellbeing of our pupils is an important part of their overall education. We do this through our Personal, Social and Health Education learning throughout the year. The three main areas that are taught in all classes are:

- Autumn term: **Living in the Wider World** – rights and responsibilities, taking care of the environment and money
- Spring term: **Relationships** – healthy relationships, feelings and emotions, valuing differences
- Summer term: **Health and Wellbeing** – healthy lifestyles, growing and changing, keeping safe

The aim of our PSHE curriculum is to help our pupils make safe and informed decisions during their school years and beyond.

During the **week beginning 24th June** all classes will be beginning the teaching of the Growing and Changing topic. I have attached an overview organised by classes, that shows the different aspects of teaching for all areas of the Health and Wellbeing curriculum this term. Please take time to look at what your child will be learning about, as parents you are also educators and it supports the work we do in school if you are able to discuss this learning with your child at home.

Relationship and Sex Education (RSE) is an important part of the Growing and Changing topic. As you can see from the plan our teaching covers topics such as: *knowing and naming the main parts of the body including external genitalia, hygiene, body images and the media, recognising and managing feelings, changes that happen in puberty, how a baby is made, and how it grows and the responsibilities of parents and carers.* During this teaching, pupils will be able to ask questions, which will be answered factually and in an age appropriate manner.

Some parts of Relationships and Sex Education (RSE) are compulsory – these are part of the National Curriculum for Science. Parents can choose to withdraw their children from all other parts of sex education if they want to.

For parents of children in Year 5 and 6 please see the additional letter attached providing further details from Rebecca Priscott the School Health Nurse about the specific teaching of puberty and how babies are made. There is an opportunity for parents of Years 5 and 6 children to view the content of the resources used at 9:00 on Tuesday 25th June. Please email Mrs York in the school office if you would like to attend this session.

If you have any queries about the content of the teaching taking place during the week beginning 24th June please arrange to speak with your child's class teacher in the first instance.

Best wishes

Mrs LJ Murrey
Headteacher

Summer Term PSHE overview

	Health and Wellbeing		
	Healthy Lifestyles	Growing and Changing	Keeping Safe
Year 1 and 2	<ul style="list-style-type: none"> To know some of the things that keep our body healthy (exercise, diet, sleep, rest) To know about making healthy choices To know about different kinds of feelings and share simple strategies about how to manage these To know how change may feel To know about basic hygiene and how to maintain 	<ul style="list-style-type: none"> To recognise what they are good at and set simple goals – link to growth mindset To learn about growing from young to old and how people's needs change To know the name for the main parts of the body, and similarities and differences between boys and girls. This includes external genitalia (vagina, penis) 	<ul style="list-style-type: none"> To know that household products, including medicines can be harmful if not used correctly To know the rules for keeping safe including: online safety, cycle safety, road safety, rail, water and fire safety To ask for help if they are worried To know about privacy in different contexts
Year 3 and 4	<ul style="list-style-type: none"> To know about what makes a 'balanced lifestyle' To learn about making choices in relation to health To learn about opportunities we have to make choices about the food we eat To learn about what influences our choices about food To know that images in the media do not necessarily reflect reality To learn that simple hygiene routines can prevent the spread of bacteria and viruses To learn what is meant by a habit and how these can be positive or negative 	<ul style="list-style-type: none"> To recognise personal achievements and describe what they are proud of, be able to set personal targets for the future To learn about a wider range of feelings, both good and not so good To know that people can experience conflicting feelings at the same time To explore describing their feelings to others To learn about changes that happen in life and the feelings associated with this 	<ul style="list-style-type: none"> To learn about managing risk in familiar situations and keeping safe To learn about feeling negative pressure and how to manage this To know how to get help in an emergency To consider risks in the local environment and how we keep safe To know about drugs that are common in everyday life (caffeine, medicine, alcohol and tobacco) To know about keeping safe online To learn about people who keep us stay healthy and safe
